Workshop Programme 2010

HSPAP continues to run a workshop programme for local coaches, despite the loss of workforce development funding which had previously helped to make the cost affordable. The cost of most sports coach UK workshops has trebled in this financial year.

Despite that, workshops such as Safeguarding & Protecting Children, Equity In Your Coaching and First Aid are well attended – they are required for Clubmark accreditation and for some coaching awards. Other workshops that are seen as being more developmental in nature, covering topics such as long-term athlete development and disability sport, have seen a downturn in enrolments.

HSPAP remains the largest provider of workshops in the region, having arranged nearly 40 workshops prior to Coach Education Week.
